CASE STUDY - FLEET / GPS

REAXIUM

SUMMARY

Reaxium provides school transportation and security solutions for students and their parents

The wireless carrier's sunsetting of 3G data service required new devices to be certified on a timeline that would not impact their end users

Partnering with Choice IoT enabled Reaxium to complete device certification and transition to new devices on time, all while seamlessly managing their fleet usage utilizing the CAMP™ Platform

OVERVIEW

Reaxium is the premier school transportation monitoring solution for Florida education. Their solutions are designed to create safer environments, improve efficiency, and provide real-time visibility. Having a robust, wide-area cellular network to run their solutions on is a key component to provide that visibility to educators, adminsitrators and parents.

CHALLENGES

Reaxium's transportation solutions were all utilizing the legacy 3G network, which was in the process of being de-commissioned in early 2022. New devices had to be selected, and then certified by the carrier. Reaxium required a wireless connectivity partner that not only had acces to the the largest and fastest 5G Network for their upgraded solution to run on, but also had the expertise and carrier relationship to get the transition comepleted without impacting their end users prior to the end of the school year.

SOLUTION

Partnering with Choice IoT provided Reaxium with a single pane of glass platform to easily manage their devices. Choice's connectivity and management platform CAMP™ allowed them to quickly deploy their GPS trackers and tablets, effectively maintaining control of their data costs. CAMP is accessible from any mobile browser and allows Reaxium the ability to activate SIMs quickly, manage ticketsm all while providing visibility into data usage with detail reports and alerting capabilities, helping streamline operations and improving cost controls.

"We would recommend Choice IoT because they've been a joy to work with and are solution providers at heart. The effort to go the extra mile for customers is reflected in our business and in theirs, we see a great match! "
